

LR-Cal Hydraulic pressure comparison test pump Pressure up to 7,000 bar

Rel. 20250702

### High pressure comparison test pump LR-Cal LSP-7000, up to 7,000 bar (101,520 psi)

#### Pressure Source for calibration purposes Operating fluid: oil

Pressure Comparison Test Pumps are used to generate pressures for checking, adjusting and calibrating mechanical and electronic pressure measuring instruments by comparative measurements. These pressure tests may be carried out in laboratories, workshops or on site at the measuring point.

The comparison test pump LR-Cal LSP-7000 is equipped with two connections for the test specimen and the reference instrument which can be used in any order. If the instrument to be tested and a sufficiently accurate reference measuring instrument are connected to the test pump, the same pressure is applied to the two measuring instruments when the pump is operated. By comparing the two measured values at random pressure values, the accuracy can be verified or the instrument under test can be adjusted. First the pressure is set via an integrated initial (priming) pressure pump. For further pressure generation and for fine adjustment by approaching the measuring pointsprecisely an adjustable volume with precision spindle is available. Another important feature of the test pump LR-Cal LSP-7000 is the rotating spindle that only runs inside the body of the pump. This eliminates the negative effect of a bending torque on a spindle turning outside the body and offers the advantage, especially for use in the field, that the dimensions of these pumps do not change during operation due to the spindle turning.

| Order-Code:                  |           | LSP-7000-HP  |
|------------------------------|-----------|--|
| Pressure range:              |           | 07,000 bar / 0101,520 psi  |
| Medium:                      |           | Oil  |
| Pressure ports:              |           | 2 x M16x1,5 male thread, rotating, changeable, with sealing cone |
| Distance of the test con.:   |           | 346 mm   |
| Liquid reservoir:            |           | 250 cm <sup>3</sup>  |
| Piston diameter:             |           | 7.5 mm   |
| Swept volume per revolution: |           | approx. 0.08 cm <sup>3</sup>                                     |
| Overall swept volume:        |           | approx. 2.5 cm <sup>3</sup>                                      |
| Required moment              | 250 bar   | 1.5 Nm   |
| at                           | 500 bar   | 3.0 Nm   |
|                              | 1,000 bar | 6.0 Nm   |
|                              | 3,000 bar | 18 Nm  |
|                              | 5,000 bar | 30 Nm  |
|                              | 7,000 bar | 42 Nm  |
| Materials:                   | Cylinder  | Stainless steel  |
|                              | Piston    | Hardened steel   |
|                              | Tubing    | Stainless steel 1.4404, 6 x 2 mm                                 |
| Sealing gaskets              |           | NBR  |
| Dimensions:                  |           | W 460 x D 445 x H 265 mm   |
| Weight:                      |           | approx. 32.5 kg  |
| CE-Conformity:               |           | 97/23/EC Pressure equipment directive (module A)                 |
|                              |           |  |

# LSP-7000 Hydraulic pressure comparison test pump LR-Cal

### **Dimensions**:

# **Optional Accessories:**

| Order-Code   | Description  |
|--------------|--|
| LSP-HP-FLUID | Operation liquid, 0.5 l in plastic bottle  |
| LSP-HP-A-M16 | Threaded adapter M16 x 1.5 male thread with sealing cone<br>Material: hardened stainless steel                                 |
| LSP-HP-A-M20 | Threaded adapter M20 x 1.5 male thread with sealing cone<br>Material: hardened stainless steel                                 |
| LSP-HP-A-916 | Threaded adapter 9/16-18 UNF male thread with sealing cone<br>Material: hardened stainless steel                               |
| LSP-HP-A-G12 | Threaded adapter 1/2" BSP female thread with O-ring, <b>max. 1,600 bar</b> (max. 23,200 psi). Material: stainless steel 1.4571 |
|              |  |
