The portable micro bath temperature calibration devices **LR-Cal LTC 100-F**, **LR-Cal LTC 100-F-PLUS** and **LR-Cal LTC 200-F** serve as temperature source and reference device in one, for testing, adjustment and calibration of temperature measuring devices of all kinds. They are also particularly suitable for laboratory and glass thermometers as well as temperature probes with e.g. 90° bends. The optional micro bath inserts **LTC-F-INSERT-FL** simplify the use of the device considerably if you work with different silicone oils: you simply exchange the container (insert) instead of emptying and cleaning each time.

### Options and accessories

Order-Code: **LTC-F-EXTSENS**

If you like to use the instrument with an external reference sensor (which is placed directly in the reservoir, very close to the units under test):  
 Option with 2nd. PID for external reference sensor incl. FA-DIN 6 plug for 3-/4-wire Pt 100 probe (incl. wiring diagram).  
 If a probe is required from us, please order code **LTC-F-PT100** in addition.

Order-Code: **LTC-F-PT100**

External reference temperature probe Pt 100 complete with FA-DIN 6 plug for direct connection to the socket at the front of the calibrator. Temperature range -50...+300°C, accuracy ±0.1°C, probe diameter 4 mm, length 300 mm. For using this thermometer with the calibrator, **LTC-F-EXTSENS** must be ordered in addition. If this probe is ordered (also with **LTC-F-EXTSENS**) together with the instrument, the supplied factory certificate also indicates the values of this external probe.

Order-Code: **LTC-F-DECKEL-05**

Tank lid made in transparent methacrylate. With 5 drillings for units under test plus 1 sender drilling for the optional external reference probe, can be used also with 6 items under test. This accessory supports easy fixing of units under test and avoids temperature drops, caused by open reservoir.

Order-Code: **DKD-T-KAL-TK-6T**

DAkkS certificate of calibration (instead of factory certificate of calibration).
